VOL. XXXX, No. 12

DIDSBURY, ALBERTA, THURSDAY, MARCH 25th, 1943

\$2.00 per Year. 5 Cents a Copy

## Westerdale M.D. Organization Meeting

Councillor Alex Hogg was elected Reeve at the organization of the Westerdale Council held recently at Didsbury. Councillor Geo. Clark was appointed deputy-Reeve; C. E. Reiber, Auditor; A. McNaughton, Assessor; and Geo. Youngs, Weed Inspector.

Mr. and Mrs. Hogg were appointed to the Didsbury Hospital Board, and Mrs. W. Davidson and Councillor Geo. Clark to the Olds Hospital Board. Councillor F. Jackson was appointed representative to the Rosebud Health Unit.

The estimates for the year were dealt with and the municipal rate was increased one mill over last year and the school rate was increased 15 mill.

Councillor Niddie reported that the mill rate for the Olds Municipal Hospital District would probably be 3 or 3½ mills and would be levied on the portion of the municipality within the hospital district. As the requisition had not been received, the tax rate could not be set.

A resolution was passed to allow 10% discount on current taxes paid on or before June 30, and the usual 5% discount on taxes paid on or before December 15.

Mr. W. A. Austin appeared on behalf of the Didsbury and Olds branches of the Red Cross Society, and asked that grants be again made to the Society.

It was decided to again make grants of \$300.00 each to the Didsbury and Olds branches.

It was decided to handle gopher poison as in previous years, and the bounties on crows and magpies were set at 1/2¢ per egg; 1/2¢ per pair of young feet and 5¢ per pair of old feet.

Reeve Hogg was appointed supervisor of road grading for 1943.

The council meetings were set to be held on the first Saturday of each month, as had been the practice in previous years.

Miss Grace Ranton of Edmonton, spent last week at her home here.

## Local Cattle at Calgary Bull Sale

Several local Hereford Breeders have entered bulls in the Calgary Spring Show and Bull Sale, which will be held next week.

Earl Kinck has entered four, Ed Kinck four, A. Robertson & Sons two and A. M. Robertson two. The cattle will be shipped to Calgary this weekend.

Bobby Hughes has entered a steer in the baby beef class.

The above, along with J. Hughes, are each taking a pure bred calf which they have donated to the Red Cross Calf Sale.

Here's hoping the boys have lots of luck with their entries.

## Brings Down Nazi Plane

Wing Commander Howard P. Blatchford D.F.C., son of Mrs. K. A. Blatchford, who is at Ranton's, who led a squadron of Spitfires that escorted R.A.F. bombers over the Netherlands last week, is credited with shooting down one Nazi Focke Wulf 190 and hitting another.

It was Blatchford's second operational flight, after he spent six months on the ground as station officer at a fighter command group.

## Evangelical Church Notes

The theme on Sunday morning at 10:30 will be "The Healer of the Cross". The spotlight of the ages has been turned upon Simon, the Cyrene, because he carried the cross of Jesus. There is a cross for every one to bear; may we bear it with patience. There will be no evening service.

Services will be held at Jutland at the home of Mr. F. McCaig, at 2 p.m.

The Albright Brotherhood will meet on Monday evening, March 29, at 8 p.m. All men are invited to attend.

Commencing next Monday, Law's Drug Store will close each evening at 6:30, excepting Saturdays.

## Red Cross Drive Nears Objective

It is now assured that Didsbury will pass its objective of \$3,000.00, by a substantial margin when the reports are all in. Up to Wednesday noon, cash subscriptions amounting to \$2,847.00 had been turned in and the full returns are not yet in.

The drive is now drawing to a close, and all canvassers who have not yet completed their canvases, are asked to finish their work and bring in their report before the end of March.

Any person who has not been contacted, is asked to call at the office or mail their subscription to C. E. Reiber, treasurer.

## M.B.C. Conference.

The Canadian North-West Conference of the M.B.C. Church will held at Didsbury during the next week. Commencing Tuesday, March 30, an all day conference beginning at 10:00 a.m. and closing with an evangelical service in the evening at 8 o'clock.

The Conference will be in session throughout the week with evening services which will be of interest to all.

Wednesday and Friday evenings at 8 o'clock, Prophetic Lectures by Rev. A. J. Schultz, of Ontario.

Thursday evening - Illustrated Missionary Lecture by Miss Maggie Finlay, returned missionary from Nigeria.

Sunday morning, afternoon and evening services, to which all are invited.

## Goes By Freight Comes Back By Air

Sam Krueger, who went to Vancouver two weeks ago, via freight train, decided that rail travel was too slow, so he returned via the airways and reached home on Monday.

Going out it took Sam 48 hours to reach his destination, but on his return, it only took 3½ hours to reach Calgary.

On the outward journey he accompanied a Falkner Kentucky Stallion which had been sold to a Chilliwack gentleman.

The boys say it was Horseman Sam who went out, but Flying Sam who returned.

## Spiking a Rumour!

One of the Red Cross canvassers reports that the only person he approached during the drive who did not subscribe, accused him of getting a rake-off. This is the meanest kind of an excuse to offer the canvassers, as everyone should know by this time, that they not only give their services and even pay for the gas for their cars, but are also among the more generous subscribers.

No person connected with the local branch of the Red Cross receives any remuneration for their services.

They work because they know the splendid service the Red Cross is doing for humanity.

## Old Ration Book Expires March 31

Exit March . . . and with it goes the first ration book to be used by Canadians. After the end of the month, coupons for sugar, tea and coffee in the old ration book will no longer be good for purchase of the ration allotment. Hereafter only butter coupons were given an expiry date.

Coupons now valid in ration book 2 are:

Purple, butter, No. 2 good for 1½ pound, Saturday, March 20.  
Batter, No. 3, good for 1½ pound, Saturday, March 27. Coupons 1, 2 and 3, for butter, are good until April 30.

Pink coupons 1 and 2 for sugar, and green coupons 1 and 2 for tea or coffee became valid March 6. Coupons 3 and 4, for tea, coffee and sugar will not be valid until April 2.

There is no expiry date for tea, coffee and sugar coupons in ration book 2.

## Special Speakers at Livestock Meeting

In addition to the discussion of the annual report, election of officers and other business at the annual meeting of the Mountain View Livestock Marketing Association, which will be held in the Elks Hall, Olds, on Saturday, March 27, there will be two speakers on agricultural subjects.

Dr. Percy Talbot, provincial veterinarian, and Walter R. Ross, of the O.S.A., will speak on "Artificial Insemination of both Grade and Purebred Cattle".

The meeting will commence at 1 p.m., while the speaking will be at 3:30 p.m.

Everybody is welcome to attend the meeting.

## Obituary.

### WHITESIDE

Mrs. Emma Whiteside, aged 59 years, wife of Joseph Whiteside, passed away at her home west of Didsbury, on Monday, March 22nd, after a long illness.

Born at Havelock, Ontario, on February 17, 1884, she came to Alberta in 1910. She was married at Edmonton on July 4, 1912, to Mr. Joseph Whiteside, making their home at Didsbury, where they have since resided.

She is survived by her husband, one daughter, Mrs. C. E. Gibbs, one son, Douglas, at home, and three grand children. Also two brothers, William Hubble, of Norwood and David Hubble, of Tisdale, Sask., and one sister, Ella, at Havelock, Ontario.

The funeral service will be held at Knox United Church, on Wednesday afternoon, and the interment took place at the Didsbury cemetery.

Herb Fisher had charge of the funeral arrangements.

## BAPTONE

A Beautiful Soft Flat Finish Paint

The makers of the famous "Bapco" products now offer a remarkable new type finish entirely different to the usual paints, varnishes, enamel, or kalsomine.

It is a synthetic paint that is washable and has several features not obtainable with ordinary finishes. It has amazing spreading power, making possible a decided saving when coating large areas. Baptone is a utility product, which you can use with absolute satisfaction on new or old plaster walls, over all types of wall board no matter how porous and will make a perfect job over kalsomine and wall paper.

## Care Of Radio

If Radio Reception Is Weak, Batteries Should Be Checked

In many sections of Canada battery-operated radios are used. Particularly in the rural areas and in the far north, these sets are a means of communicating war news and of bringing entertainment to countless people.

If reception is weak, both the "A" and "B" batteries should be checked. If the batteries are weak they should be replaced or recharged. If, however, the batteries are fully charged, and the aerial and ground wires properly installed, and the reception is still weak, a radio dealer should be consulted at the earliest opportunity.

Only the type of batteries recommended by the radio set manufacturer should be used. Tube circuits in battery-operated radios are designed for a definite voltage, and satisfactory performance can only be obtained by operating the radio according to specific instructions.

A good outside aerial should be used on a radio in the rural districts. Because radios in the rural district are distant from sources of interference such as power-line noise, street car wires, and so on, a good outside aerial will enable the radio to turn in a good performance at all times.

## Roll your owners! go for Ogden's

Indians on the prairies never discovered the use of wheels. . . . But outlanders cottoned on to Ogden's. They soon discovered it to be a distinctive blend of choicer, riper tobacco. . . . the answer to a roll-your-own's prayer. Try it today.

Ogden's quality for pipe smokers, too, in Ogden's Cut Plug

## Canada's Lend-Lease Plan

IN 1943 CANADA WILL MAKE available to the United Nations \$100,000,000 in war supplies on a lend-lease basis, and the announcement of this plan has been received with pride and gratification by the people of Canada. Last year, the same amount of money was sent to Britain as a gift, and the British government used it to send war supplies to the many fighting fronts both of the Empire and our Allies. Under the 1943 arrangement, Canada will deal directly with the governments of the Allied nations and will in this respect assume her part as a full member in the United Nations. When the war broke out, production of munitions and supplies in Canada was very small, and it is a remarkable achievement that in three years we have been able to develop the capacity to produce almost any of the war supplies needed by ourselves and our Allies.

## Foreign Press Approves Plan

It is likely that as a result of the 1943 Lend-Lease scheme, Canada will be supplying war materials to Russia, China and many parts of the British Empire. The press in other countries has been enthusiastic about the scheme, and one London paper said, "This is only the last step in the road, she (Canada) has had her heart and back in the war since the beginning." In Australia and New Zealand, too, the plan has been praised, and in Australia it was observed that the sum involved represented more than half of that country's war budget last year. In Russia and China, approval of the scheme was also expressed, and it is expected that as a result of the measure, the flow of supplies from Canada to all these countries will be accelerated. Because this plan in many ways resembles the Lend-Lease Act in the United States, the two nations will collaborate to avoid duplication in their work.

## Raw Materials, Food, Included

Attention has been drawn to the fact that not all war materials exported from Canada will come under the Lend-Lease plan. Those countries which have Canadian dollars with which to pay for their purchases will do so. It is only the excess, for which they cannot pay which will be dealt with on the lend-lease basis. Hon. J. L. Leley, Minister of Finance, has pointed out. Neither does the plan include only armaments and military equipment. It covers, in addition, food and raw materials which are essential to the prosecution of the war. Munition workers, farmers, and all those who are engaged in production in Canada today, may feel justly proud of the part they have played in bringing this nation to only eleven million people to the level in production at which she can supply not only her own needs, but can extend appreciable aid to the other nations who are fighting with us in the cause of freedom.

## COULD BE ELIMINATED

"Noise is noise at any time" is the slogan of newspapers urging a campaign for noise restriction. Municipal authorities have enforced rules which put down night-time clamor by 50 per cent, but have done nothing about daylight clamor. Eighty per cent of the day-noises could be eliminated, newspapers claim.

There are bullets in bulletproof. Protection in bullets. Service in Savings. Lend now to your country. Invest in War Savings certificates!

## ALL-BRAN TAUGHT ME SOMETHING ABOUT CONSTIPATION

When you're busy as most of us are, working to help win the war, it's doubly important to know what ALL-BRAN can do to relieve the cause of constipation due to the lack of the right amount of "bulk" in the diet. It's a "better way" than forcing yourself to take purgatives that offer only temporary relief.

Eat ALL-BRAN every morning. That's the simple means that thousands use to keep regular. RATTIALLY! Enjoy it as a cereal or in muffins. . . . drink plenty of water. . . . and see what it does for you! Buy ALL-BRAN at your grocery's, sold in two convenient sizes. Made by Kellogg's in London, Canada.

## HAS MORE CATTLE

Although Manitoulin Island has lost a quarter of its population to the armed forces and war industry, its beef cattle population has gained 50 per cent, and there are now three sheep to each one before the war.

## THE CLEVER JAPS

Japan supports its 70 million people on an area of arable land that could be contained in a circle with a radius of 75 miles. We'll really have to fight hard to beat people who can do that.

## SWINE DISEASES

Worms Thrive When Animal Resistance Is Reduced By Other Causes

This is the fifth of a series of six articles by J. L. Miller, D.V.M., D.M.S., provincial veterinarian, Regina, dealing with the common swine diseases. The following will appear next week. Previous installments: Hysterical Swine, Worms and Thrush, The Parasitic, Blackhead, Pneumonia, Rotavirus, and Typhoid.

Young pigs which are raised under good sanitary conditions and are kept in a healthy thrifty state seldom become heavily infested with worms. Worms, like all other parasites, seem to thrive on animals which have had their resistance reduced from other causes. Adult swine are rarely heavily infested by worms, but usually harbour a few of these parasites. The common round worm, *Ostertagia*, is the only parasite which infests hogs to any great extent in this province. The worm is from six to ten inches in length, about the size of a small pencil in diameter, tapering off to a point at each end. It is found chiefly infesting the small intestine.

In order to realize the damage done to the host by these parasites, something of its life cycle should be understood. The female worm lays eggs in the intestine which are passed out with the droppings. On reaching the ground the eggs under favorable temperature and moisture conditions, go through a hatch which takes from fourteen to twenty-five days. Worm eggs which fail to pass through this hatch are entirely harmless to pigs. If the eggs are then consumed by a pig, the small worm is released. These microscopic worms pass through the lining of the intestine, enter the blood vessels which carry them to the liver. They then burrow through the substance of the liver, entering another group of blood vessels. These small worms spend from six to eight days in the substance of the lungs finally entering the air passages, where they cause irritation, causing the pigs to cough. Coughing brings the worms up to the back part of the throat where they are again swallowed and develop into adult worms in the small intestine. After reaching the small intestine, the worms require from eight to ten weeks before they reach sexual maturity and begin to lay eggs.

In heavily infested swine both liver and lungs are permanently damaged by the passage of these small worms. In some cases they may be responsible for the anthrax-like lesions shown by swine heavily infested with worms.

Symptoms: A persistent, husky cough is the chief symptom, together with thinness. The pigs usually have heavy, unthrifty with a variable appetite will be noted. Pigs usually become potbellied and anorectic.

Treatment: A comparatively new drug called Phenothiazine is proving effective for the removal of round worms in swine. This treatment has the advantage of being easy to administer. It is readily consumed when mixed with feed and should be given in a wet mash without any previous starving. Pure Phenothiazine can be given in the following doses:

Pigs—40 to 75 lbs. . . ½ ounce  
75 to 100 lbs. . . ¾ ounce  
100 to 150 lbs. . . 1 ounce  
150 to 200 lbs. . . 1 ½ ounces  
200 to 250 lbs. . . 2 ounces

One treatment with this drug is considered to be 70 per cent effective, by repeating the treatment in two weeks, practically all worms will be removed. Pigs treated with Phenothiazine will usually pass red or purple urine with a period of thirty-six hours after treatment.

Prevention: Worm eggs are very resistant to disinfectants, but are readily destroyed by hot water or scalding. Therefore the following method of destroying worm eggs is recommended. Prepare farrowing pens by removing all manure from the floors, walls, rails, troughs, etc. Thoroughly scald all parts of the pen with a liberal amount of very hot water containing at least two table-spoonsful of lye to a pail of water. A few days before farrowing, brush off the sow and wash the udder and teats with warm water and soap and dry thoroughly. Then move the sow into the clean pen. In seven to ten days after farrowing, the sow and litter should be moved to a clean pasture away from the barn yard. Keep the young pigs on clean pasture until they are fourteen weeks old, when they will be fairly resistant to worms, provided they are kept in a healthy thriving condition.

During winter when pigs must be kept indoors, pens should be cleaned daily, and a thorough scalding of the entire pen with hot water and lye should be carried out every fourteen to eighteen days. The treatment of sows for the removal of worms at the start of pregnancy would be fairly effective in controlling worms provided they were kept on clean ground following the treatment.

## USING CELLOPHANE

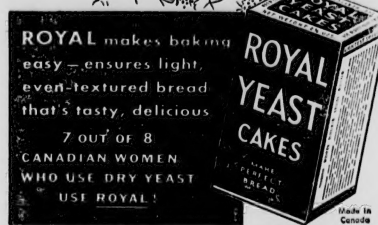

Frozen eggs are now being packaged in cellophane, with an outside overcoat of cardboard as a further contribution to the new saving program.

Commercial shipment of Canadian dried eggs are being forwarded to Britain in 14-pound packages. 2506

YOU'RE CLEVER TO MAKE SUCH MARVELOUS BREAD

I'M CLEVER TO USE SUCH MARVELOUS YEAST!

## Sugar For Canning

Guides Sent To All Householders For Applications

The Ration Administration of the Wartime Prices and Trade Board draws attention of householders to the application for canning sugar in the No. 2 Ration Book just distributed. Canning Guides have been sent to all householders to aid in the estimation of sugar which will be required by Canadian women during the 1943 canning season which opens June 1st.

In addition to the application for canning sugar, the new book also contains a guide sheet to assist the householder in estimating required sugar for preserving of seasonal fruits. The guide stipulates the amount of sugar that may be applied for, with stated amounts of fruit. The fruit used for canning, jam or jelly making, means any fresh perishable fruit that is in season between June 1st and October 1st and will include citron.

It is advised that jars and sealers must be taken into account in estimating the season's canning. Those who have not received the Canning Guide issued by the Administration may apply to their Post Office or rural mail carrier. These guides contain all directions and conditions for obtaining canning sugar.

The completed application for canning sugar should be mailed to the nearest Local Ration Board not later than April 15th.

## SELECTED RECIPES

Sponge Method For Making Four Loaves Of White Bread

4 tablespoons sugar  
4 tablespoons butter or lard (melted)  
4 teaspoons salt (1 ½ tablespoons)  
4 cups sifted flour  
1 Royal Yeast cake  
4 cups warm water, or milk or potato water

In the evening mix warm cake in lukewarm liquid and dissolve sugar in some. Sift salt with flour and add to the liquid. Beat well. Mix in melted shortening and beat again. Cover and allow to rise until dough reaches top of pans.

Bake in moderate oven and cool before storing away.

This is the sponge. In the morning add 6 cups sifted flour and knead on board to a dough which does not stick over stiffly. Roll gently out, and place meshed loaves in well greased pans. Cover and allow to rise until dough reaches top of pans.

Bake in moderate oven and cool before storing away.

## MICKIE SAYS—

ARE YOU STILL IN BUSINESS? IF YOU ARE TOO STILL, YOU MAY NOT BE IN BUSINESS LONG—SO IF YOU WANT TO BE IN BUSINESS STILL, DON'T BE STILL! ADVERTISE!

## Good Work Carried On

Scriptures Free To Men And Women Of The Armed Forces

We are pleased to remind the public that today, as they have since 1904, the British and Foreign Bible Society is seeing to it that the Scriptures are made available to Armed and Auxiliary forces of friend and foe alike, without price.

Perhaps an extract from a letter we received gives the story more clearly, so far as Canadian troops are concerned. Here it is:

"Every man and woman in His Majesty's Forces, from the soldier to a pocket copy of the New Testament and the Psalms if she or he will ask his or her Chaplain for 450,000 of these neat pocket copies have been supplied to the Chaplains by the British and Foreign Bible Society at a cost to the society of over \$800,000, but many in the services have not asked their Chaplains for their copy. In many cases, they have been given only to those going overseas, while it is the purpose to supply one to every member of His Majesty's forces. The society would be grateful for those reading this article if they would contribute, so that this part of God's Word be part of the kit of every man and woman serving the country in this war."

Buy War Savings Stamps Regularly.

## THE CORN SYRUP

with the Delicious Flavour

A pure, wholesome sweet that's always a treat

If your grocer is temporarily out of stock, the delicious syrup is worth waiting for. At present the demand sometimes exceeds the much larger quantity now being produced, because many thousands of Canadian housewives have joined the great host of "Crown Brand" users.

## Keeping A Close Tab On All Axis Submarines Operating In Waters Of North Atlantic

(By Flying Officer S. L. Tilley, R.C.A.F. Public Relations Officer)

**K**EEPING track of the positions and courses of every aircraft, surface ship or submarine—friendly or enemy—which approaches Canada's rugged North Atlantic Coast is a vital war job which is being entrusted to carefully selected members of the Women's Division of the Royal Canadian Air Force. In secret operations rooms they maintain a constant check on every Allied convoy that plows across the North Atlantic.

They record the movement of every aircraft that flies near the shores of Eastern Canada, Newfoundland and Labrador. And they plot the course of every submarine—friendly or enemy—which comes into their operational area. So secret is the work done by these Air Force women in blue that the exact nature of their duties cannot at this time be disclosed. But on Canada's Eastern coast these clerks—operational, as they are called, are today standing 24-hour watch in shifts—their intensive training having made them calm, efficient, conscientious and reliable, ready to deal with any emergency that might arise.

They work in specially equipped R.C.A.F. operations rooms, the secrets of which are so carefully guarded that not even other Air Force personnel can gain entry unless they have specific business there and have not only been identified to the R.C.A.F. police guarding the entrances but their visits officially authorized in writing by the Air Staff. And each girl who is permitted to work in these operations rooms is sworn to secrecy concerning everything she may hear or see while on duty.

The operations rooms in the Eastern Command are divided into different sections. In one large room, for example, a visitor can find R.C.A.F. women at their posts around a large circular table, on the top of which is a detailed map of the entire North Atlantic coastline. Wearing earphones every minute she is on duty, each girl is directly connected by a secret telephone line to look-out stations scattered all along the East Canadian coast. At a table nearby sit other R.C.A.F. women picking up by telephone the reports of the thousands of civilian members of the Aircraft Detection Corps, an organization originally started by the Air Force solely to provide advance warning of the approach of enemy aircraft. But the functions of the Corps have since been expanded to include the provision of information for the Navy and Army. And keen-eyed fishermen, lumbermen, fire-fighters, lawyers, doctors, clergymen, businessmen, and housewives located in populated and isolated spots all along the Atlantic seaboard, day and night watch, now report immediately by telephone the presence in their respective areas of hostile and unidentified aircraft, submarines and strange vessels and persons, details for the most part being picked up by the mail ship, the ship, floating mines and other drifting objects, friendly aircraft and marine craft in distress.

These Aircraft Detection Corps observers today form "a line of eyes" extending from the northern-most tip of Labrador, in every cove and on every headland around Newfoundland, Quebec, and the Maritimes. And their telephonic reports, which are always given instantaneous right of way over the telephone lines, are carefully recorded and checked by the R.C.A.F. women working in these secret operations rooms.

Should an Aircraft Detection Corps observer in some isolated area along the Atlantic coast spot what appears to be unidentified and possibly hostile submarine or aircraft, for example, his or her report on reaching the R.C.A.F. operations rooms is immediately checked with the map which shows the exact location of every submarine and aircraft known to be in that particular area. And the same procedure applies when an observer reports a friendly aircraft in distress which either needs advice on how to reach its home base or direction to a spot where it can make a successful forced landing.

Additional R.C.A.F. women are on duty in another operations room nearby, plotting on a twenty-foot board the day-by-day movement of every known ship, submarine, and aircraft making its way over the Atlantic. They are entrusted with the

## Not All Joy

Even Modern Science Cannot Eliminate Some Annoying Things

Unbreakable glass, shoes that have no leathers, automobiles of plastic and fuels that will give 30 to 50 miles per gallon, are some of the marvels promised by science for everyday use. Joy in contemplating the dazzling vistas opened up for the future is dampened somewhat by the strong suspicion that we will still have with us such things as toothache, high school boys who stay up late at night and are hard to arouse from coma in the morning, and wives who demand explanations.—*Brandon Sun.*

## R.C.A.F. Operations Room

—R.C.A.F. Photo.

Keeping tab on every aircraft, surface ship or submarine—friendly or enemy—that comes near Canada's rugged North Atlantic coast is a task entrusted to specially selected members of the Royal Canadian Air Force (Women's Division). On duty in eight-hour shifts through 24 hours of every day, these airwomen receive reports of all movements and plot the positions and courses on the giant wall-map. Airwoman Second Class Jeanne Robertson of Toronto (left) and Airwoman First Class Lois Hushy of Gibson's Landing, B.C., receive and check the information. AW2 Hilda Finley of Chilliwack, B.C., stands on the ladder waiting to plot the information. For security reasons any accurate information has been obliterated.

secret reports concerning all convoy movements, they know the numbers and exact location of every Allied bomber on patrol duty, and they keep ever-watchful eyes on the movements of Axis submarines in these North Atlantic waters.

Not every woman who enlists in the Royal Canadian Air Force can become a clerk-operational. The qualifications, in fact, are about the stiffest that any girl can ever expect to face. Not only is junior matriculation a minimum educational requirement, and a strong recommendation from a well-known clergyman or magistrate an absolutely essential, but every applicant before being accepted is very closely investigated as to character and integrity. The age limit is between 18-30 years, each applicant must also have perfect hearing and speech, and after being accepted must go through a thorough and difficult secret operational training course. But on its completion the big opportunity comes. The chance to do a real job for Canada's war effort, a job which is so vital that each R.C.A.F. clerk-operational knows that, without doubt, she is making a very important contribution to the cause for which the United Nations have pledged their all.

## Amateur Gardeners

Urged To Grow At Least Enough For Own Needs

M. B. Davis of the central experimental farm has listed eight vegetables which are likely to be scarce gardeners to plant Victory gardens this year to meet their own needs. The vegetables, as outlined to the Ontario Horticultural Association at Toronto by Mr. Davis, are potatoes, carrots, cabbages, tomatoes, onions, beans, green peas, and sweet corn. Cucumbers, radishes, beets and squash also should be planted.

He said the Dominion government has not encouraged Victory gardens until now, because it was felt that commercial growers could handle all demands.

## Temporary University

Ten Eminent Professors Give Generalised Lectures On Western Thought

Leonard Lynton, in the New York Post, says: Friends of Madame Chiang Kai-shek felt her interesting the Generalissimo in Western thought, and of the university which then was organized for the education of this one man. The Chiangs selected the 10 most eminent professors in such subjects as sociology, history, economics and political science. These men gave a thorough, 10-week course, consisting of two-hour lectures followed by questions put to them by the Generalissimo. And when the 10 weeks were over and the professors and Chiang Kai-shek were satisfied, the "university" was disbanded and the professors went home.

## Holds Important Post

## A Survey Is Being Made To Ascertain The Minimum Needs Of Our Public Health Personnel

Ottawa—Most sections of Canada are under-staffed with public health personnel. Dr. J. J. Heagerty, health services director of the Department of Pensions and National Health, said recently. He pointed out that "public health personnel have been depleted too rapidly by enlistments and all provinces except Prince Edward Island and Quebec are below the minimum of personnel considered absolutely essential."

Dr. Heagerty emphasized that "there always is the possibility of a serious outbreak of disease" if public health staffs are so depleted they are unable to do essential work. Such necessary duties include testing and chlorination of water services to urban populations, sanitary inspections, supervision of milk supplies, and control measures to prevent the spread of diseases such as the measures taken in the west to detect and control Moutain Plague and Rocky Mountain Spotted fever, which have been reported in southern Alberta.

The public health committee of the Canadian Medical Practitioners and Assignment Board is making a survey to ascertain the absolute minimum requirements of public health personnel as part of the "Health national health survey," he said. "When we have completed the survey, we may be able to act on recommendations being made that public health doctors, nurses and other personnel be frozen in their jobs and that provision be made to place them in special identifying outfits or to give them buttons indicating they are serving their country in indispensable posts. Dr. Fred Jackson of Winnipeg, deputy minister of Health for Manitoba, is in charge of the public health survey for the four western provinces; and Dr. John Phair of Toronto, Chief Medical Officer of the Ontario Department of Health, is in charge in the central and eastern provinces.

"Nova Scotia is in a bad state due to the war," said Dr. Heagerty. "In the provincial hospital for mental diseases, which I have known, the only medical man on the staff is the medical superintendent. The Rockefeller Foundation survey showed that Halifax's death rate has risen from 14.5 in 1937 to 17.2 in 1941 and is almost 45 per cent higher than for the rest of Nova Scotia."

"New Brunswick had ten health districts with eleven medical health officers, but has lost five of these physicians and has had to merge several districts which means doubling up the work and the expense. Prince Edward Island has had little reduction; not one of its three medical men and staff of 12 was eligible for military service.

The shortage in Quebec is comparatively slight but in Ontario the shortage has been so very great in every field that it has become necessary for one head officer to do the work of two. It also has been necessary to train health nurses to do work formerly done by medical officers, such as blood testing, and so on.

"The reduction in Manitoba has not been so great, but the demand on the health services has been greatly increased due to the war. In Saskatchewan the enlistment of rural men has been very heavy. In Alberta only five health officers are left of the nine who looked after the nine different health units. Nurses in outlying districts of Alberta are giving medical treatment because there are no doctors, even in adjacent areas. By December of last year 212 physicians had left Alberta since the outbreak of war; there are three hospitals in Alberta with no doctor left in the immediate district, one of them may have to be closed because the nearest doctor is forty miles away. The situation in British Columbia is also very bad in the outlying districts."

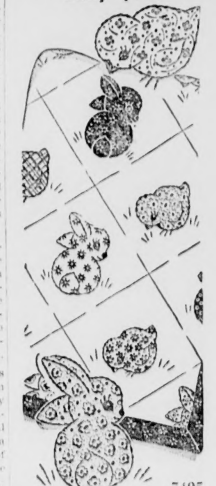

Dr. Heagerty said the pressure on public health services will increase in the spring as melting snows from farms and city streets carry pollution into streams from which drinking water supplies are drawn. Instead of daily checks on chlorination needs, hourly and half-hourly checks on water supplies will be necessary in the spring. The Dominion Government took over such chlorination work in the Halifax and Vancouver

districts because of the presence of troops.

Public health personnel have continued trapping squirrels and gophers in southern Alberta to check on the spread from U.S. western regions of Blaine plague carried by fleas on rodents. The situation is helped by the fact that the westward spread of rats from the east has not yet infected Alberta to provide more carriers. Where plague-carrying rodents are trapped, the burrows of surrounding areas are filled with poison gas. The Blaine plague has been spreading north since infected rats aboard an Orient ship entered San Francisco in 1939 and escaped from that city's sewers in the 1940 earthquake. Control measures have been taken also in the west against the Rocky Mountain spotted fever, spread by ticks which transmit a virus; and also against other transmissible diseases across the country.

"When things go well, the work of public health departments is not noticed, but its necessity cannot be over-emphasized either in war or peace times," said Dr. Heagerty. "Right now our work is not being done so well as it should; it is a matter of not having enough personnel." Dr. Heagerty said that the national survey undertaken by the Board in all phases of health is intended to help meet the problem of distribution of health, all health personnel, physicians, dentists, nurses, and laboratory workers.

## "Print" Animals On A Baby Quilt

7495

By Alice Brooks

Here's a whole "Easter Parade" for a baby's quilt. A fluffy quilt for the only baby's quilt, chicks and bunnies that decorate the quilt blocks hop right out of your scrap bag. Use a different kind of fabric animal applique. Pattern 7495 contains Block Chart, pattern pieces, quilt directions, yardage chart, illustration of quilt.

To obtain this pattern send twenty cents in coins (stamps cannot be accepted) to Household Arts Department, Winnipeg Newspaper Union, 175 McDermott Avenue E., Winnipeg, Man. Be sure to write plainly your Name, Address and Pattern Number.

Because of the slowness of the mails, delivery of our patterns may take a few days longer than usual.

## SEED FROM CANADA

A carload of radish seed was shipped from Cremona, B.C., to Great Britain with other vegetable seeds to help keep Britain and our overseas forces eating.

## The World of Wheat

by H. G. L. Strange

### — Improve The Wheat Crop —

The large surplus of wheat, coupled with the sudden war demand for more livestock products, has caused some persons to think that wheat has had its great day, and that now, therefore, less attention need be paid to wheat, mankind's finest food.

This, I believe, is an entirely wrong idea. Such investigation as I have been able to make into the food requirements of the people of the world, convinces me that there will be needs for immense quantities of wheat bread when this war is over. There will be, of course, competition to grow these needs. Several wheat growing countries besides Canada have millions of acres upon which they can grow more wheat. And so once again in the future, just as in the past, quality will increase sales.

Today, therefore, is the time for the farmer to lay his plans to improve the quality of his future wheat crop. Nothing will accomplish this better than for each farmer to sow a few bushels of Registered or Certified seed on a few acres of clean summerfallow land. In two or three years, the farmer who does this, will find a considerable improvement in the quality of his wheat, which will certainly increase his income. If the majority of farmers would follow this simple and inexpensive plan, then Canada's export wheat sales will certainly tend to increase.

### ITEMS OF INTEREST IN THE WORLD OF FOODSTUFFS

Sweden's fall seedlings of bread grains is estimated at 385,000 acres, the smallest acreage in 50 years—As a result of reduced acreage. Australian barley production in 1942-43 is reported to be much less than in 1941-42—Feed deliveries from the head of the Great Lakes to Eastern Canada have been held up because of bad weather and heavy war transport on the Railways.

Egypt's 1942 grain production is reported to be well above the poor 1941 crop—The U.S. Commodity Credit Corporation has announced that loans on this year's barley crop and grain sorghums will be 15 to 32 cents a bushel higher than on the 1942 crops—Mexico's 1942 corn crop is officially estimated at 92,751,000 bushels compared with 83,621,000 bushels in 1941.

### Require Removal Of Internal Fats

Food Administration, Wartime Prices and Trade Board, has issued an order, effective March 25, requiring anyone who slaughters cattle for sale as beef, to remove at the time of slaughter, side, quarter or cut of beef offered for sale, the kidneys and internal fats. The order provides that the slaughterer must remove kidney fat, including fat adhering to the tenderloin or flank; the internal fats adhering to the body cavity known as omentum or pelvic fat, as well as the internal brisket fats, including fat in the heart area which does not adhere to the heart when it is removed, and also the cod fat udder and udder fat.

The order, designed to salvage large quantities of beef fats required for essential purposes, does not apply to carcasses, parts of carcasses or cuts of beef frozen before March 25.

## HOW TO FILL OUT YOUR APPLICATION FOR CANNING SUGAR

This year housewives must estimate in advance the amount of sugar required for canning and jam-making, so that arrangements may be made to provide and distribute the necessary supplies. Applications must be sent in to your Local Ration Board by April 15th. Use the application in your new Ration Book for this purpose.

Canning sugar will be allowed for all fresh fruits, including citron and wild fruits. Marrow, tomatoes and pumpkins are considered as vegetables and no canning sugar will be allowed for them.

### CANNING

Allow ½ lb. of sugar for each quart sealer.

Estimate the TOTAL number of quart sealers you plan to put up—then use the quick, practical method of allowing ½ lb. of sugar for each quart sealer. Don't try and decide exactly the number of each kind of fruit you plan to put up. Some fruits may be more plentiful than others. Base your estimate on the number of sealers you have on hand, what you put up last year, or what you think your needs will be this year.

Your completed application must be sent to your Local Ration Board by

Estimates based on these methods are within the canning sugar ration, and the amounts are satisfactory for wartime canning and jam and jelly making, as proven by test in the Dominion Department of Agriculture experimental kitchens.

### JAM or JELLY MAKING

Allow 1½ lbs. of sugar for each quart of jam or jelly.

Most people use jars of various shapes and sizes. Take a number of the jars you usually use and see how many cups of water they hold. Four (4) cups make a quart. In this way you will be able to estimate the number of quarts of jam or jelly your jars will hold. Then allow 1½ lbs. of sugar per quart for your requirements. For example, for 8 quarts of jam or jelly, you will require 12 lbs. of sugar.

### IMPORTANT NOTE

The Dominion Department of Agriculture recommends canning fruit in preference to making jam or jelly because:

Mince fruit can be put up with less sugar and at less cost.  
Canned fruit retains more of the vitamin value of the fresh fruit.

### WHEN AND HOW CANNING SUGAR WILL BE MADE AVAILABLE

When your Local Ration Board has received your application you will be provided, sometime before June 1st, with special canning sugar coupons. These coupons will entitle you to buy sugar, at any grocery store, at specified intervals. You do not have to buy all your sugar at once.

### COMPLETE AND SEND IN YOUR APPLICATION BEFORE APRIL 15

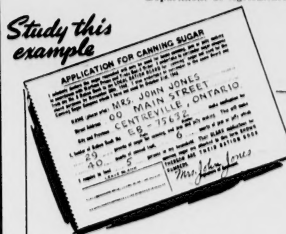

Complete your application form as shown in the illustration and mail it to your Local Ration Board not later than April 15th. Attach the application forms from the ration books of the other persons you will be feeding in your household. Do not write anything but the serial numbers of the owners on these other forms. Simply copy the serial numbers from the front of their ration books on to their application forms and pin them to your own fully completed application.

In estimating your canning and jam-making requirements, storage space should be carefully considered. Poor storage may cause spoilage and waste. Canned fruit should be kept in a cool, dry, dark place. Don't use canned fruits on your table when fresh fruits are available. Plan to use your home-canned fruits in the winter months only.

## Notes From the West

The home of Mr. and Mrs. H. Hoogood was filled to overflowing on Wednesday, when neighbours and friends gathered to wish "God Speed" to LAC Leslie Evans. The evening was spent in games, and a silver celebration was taken up and presented to the guest of honor, after which the hostess served a delicious lunch.

Mr. and Mrs. Allan McRae visited the latter's parents, Mr. and Mrs. S. Wright, on Sunday.

Among those visiting Mr. and Mrs. H. Hoogood on Sunday, were Mr. and Mrs. Alfred Cowitz, Mr. and Mrs. A. Hogg, and Mr. W. McInnis.

Mr. and Mrs. A. McInnis spent the past week in Edmonton.

## Too Late for Last Week

LAC Leslie Evans arrived on Friday from Victoria, to spend his leave with his parents.

The Willing Workers met at the home of Mrs. Royson, Wednesday of last week with 16 present. Two comforters were tied one to the Red Cross and one to raffle Jack Gillies having the lucky ticket. The next meeting will be at the home of Mr. Blain sr., March 24.

On Friday the Willing Workers held a whist drive at the home of Mr. and Mrs. C. Birt with ten tables, the honors going to Mrs. C. Birt and Mr. O. Blain. Mr. O. Blain also held the lucky ticket on the pitcher 14 and 30 was cleared. Mr. Campbell proposed the vote of thanks to Mr. and Mrs. Birt for the use of their home.

## Lone Pine Notes

A very enjoyable card party was held at Fred Metz's home on Friday last, in aid of the Red Cross funds. Bridge and whist were played. Mr. and Mrs. Otto Faas won the bridge honors, while Mrs. A. Patterson and Pat Coates won the whist. Consolation for bridge went to Miss Rene and Henry Campbell, the whist consolation to Miss Hazel Lachman and Owen Milne. The nice sum of \$12.50 was realized for the Red Cross. We all send thanks to Fred and Mrs. Dowell for a very fine evening, and hope they have another one soon.

Word has been received from Mrs. Bert Pross that she will be home shortly from the coast where she has spent the last three months. We will be glad to see her, as we miss her in our community.

Owen Milne spends many evenings at the new councillor's home. What's the attraction?

Mr. and Mrs. James Shiels are spending a month in Ontario at their old home and with relatives there.

Another of our local boys has joined the airforce; he is John Clark, son of Mr. and Mrs. Joe Clark, and is now stationed at Edmonton. We wish you luck, Jack.

We are Charlie Mardon is travelling east now.

Our road going south has been kept open by the Ford tractor. Thank goodness!

Miss Una Jenkins has returned home from Calgary.

Mr. Geo. Long has spent the week helping at the Wood's Home.

Dr. K. W. Sealy  
Director, Agricultural Department  
North-West Live Stock Association

## Seed Treatment

"No problems are important at the time of year:

1. Is seed treatment necessary?  
2. What is the best treatment?  
Unfortunately, direct answers to these questions are impossible. We can do most of the second one fairly easily, however. The following solutions were agreed upon by plant pathologists from all three provinces at a meeting held in Olds, Alberta, last summer:

1. That the use of formaldehyde for the treatment of wheat and other hullless seeds be discouraged in every way possible.

2. That organic mercury dusts be recommended for the treatment of wheat, oats, barley and flax, and that treatment be at least 24 hours prior to sowing.

3. That if formaldehyde is used at all, it should be limited to the treatment of special lots of smutty hullless oats.

Now for question 2. Local authorities in Alberta advise treatment of all cereal seeds.

In Manitoba, farmers are advised to treat all flax and barley seed, using 1½ ounces of mercury dust per bushel for flax and ½ ounce for barley. Of course smutty wheat seed must not be treated; but, in the absence of smut, we lack official advice.

In Saskatchewan we are told that "seed is not known to be free from smut it should be treated."

The same authority, Dr. R. C. Russell continues: "Occasionally, however, when the seed coats are badly cracked or a high percentage of the seeds carry a fungous parasite, which causes common root-rot, treatment with a mercurial dust may be beneficial." (Italics ours).

Send enquiries to Dominion Laboratories of Plant Pathology at Edmonton, Saskatoon and Winnipeg.

CANADA NEEDS 40 MILLION POUNDS OF FAT

HERE IS YOUR SECRET WEAPON

GLYCERINE

# Save Fats and Bones

AND HELP SMASH THE AXIS!

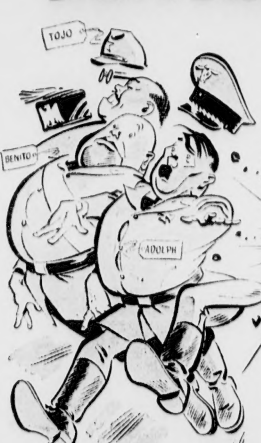

The next time you are frying or roasting something, just imagine the satisfaction it would give you to pour that hot fat right down the back of Adolf, Tojo or Benito.

You can even do better than that. Fats make glycerine, and glycerine makes high explosives to sink their submarines, destroy their airplanes and tanks. Bones produce fat, also glue for war industry.

Every spoonful of dripping, every ounce of scrap fat, and every bone, cooked, uncooked or dry, must be saved. Strain all drippings through an ordinary strainer into a clean wide-mouthed can. When you have collected a pound or more of fat drippings take it to your meat dealer who will pay you the established price for the dripping and the scrap fat. Or you can dispose of them through any Municipal or Salvage Committee collection system IN EFFECT in your community.

You can be a munition maker right in your own kitchen. So—every day, this easy way, keep working for Victory by saving every drop of fat dripping, every piece of scrap fat, and every bone.

This campaign is for the duration.

DEPARTMENT OF NATIONAL WAR SERVICES  
NATIONAL SALVAGE DIVISION

WORLD HAPPENINGS  
BRIEFLY TOLD

Four Catholic churches in Great Britain had been destroyed in air raids up to autumn, 1942, and 158 damaged, according to Universe, Catholic periodical.

More of Mary's little lambs are needed. The U.S. department of agriculture has sent out an SOS to sheep growers to increase their production.

Validity of the Alberta government's conservation program was upheld in a judgment handed down in supreme court at Calgary by Mr. Justice W. A. Macdonald.

Of 5000 men serving in the Royal Norwegian Navy, 1200 have been posted as gunners aboard ships of the Norwegian merchant marine, which still includes 700 ships manned by 22000 men.

A spokesman for the external affairs department and it was impossible to make any comment upon the suggestion that Jamaica must become an "integral part" of Canada because her economy was so inextricably linked with that of the Dominion.

Manitoba, British Columbia, Saskatchewan and Ontario have all made representations to the federal government during the past year for an increase in the present amount of \$20 a month paid under the old age pension legislation.

## Has Her Memories

Centenarian Living In Ontario Recalls Early Days In Canada

Memories of nearly a century ago still burn for Mrs. John G. Telford of Vineland, near St. Catharines, Ont. These were days, recalls Mrs. Telford, who is 100 years old, when Canada began to take her place as a busy infant in the family of nations of the world, days when floors were of sand instead of sanded hardwood, and the heavily furnished hearth was shared from dawn to dusk by the family. She remembers seven generations of her own.

Girls of her day, says Mrs. Telford, would have a spinning wheel on a wagon and drive from the house of one settler to another, spinning for hire wherever they could. No time clocks gauged the hours of toil, and women were glad to receive 25 cents for a day's toil, while husbands, brothers, fathers or sons labored from dawn to dusk in the fields for 50 cents.

Anniversaries then, remembers the centenarian, were quiet parties and singing and spelling bees, and no one worried about food rationing. As winter approached logs were slaughtered and stacked and pickled, soured, kept put down, fruits and vegetables canned and, with a sack or two of flour, a few other staples and a cow in the farm, the family got on.

Your country needs your money now. You will need it in the future. Buy War Savings certificates.

## FLYING OFFICER GEORGE F. BEURLING

D.S.O., D.F.C., D.F.M. and BAR

Below is a report of an interview with PO George Beurling, decorated representative of the Press, including the Winnipeg Newspaper Union, at the Fort Garry Hotel, Wednesday, February 24th, 1943. The interview was under the direction of Squadron Leader McColl of Ottawa and Flight Lieut. Anderson, Press Liaison Officer No. 2 Air Command.

"Canada's Ace  
Fighter Pilot"

At 26, George Beurling has packed into the past three years more adventure, thrills and narrow escapes from death than would befall the average man in several lifetimes. Stationed at Malta, he ran up the remarkable score of 29 enemy planes destroyed during a period of five months, to become the most outstanding combat pilot of the R.A.F. Learning to fly at the age of 14, by the time George Beurling turned 17 in 1929 he had 150 hours in his logbook. With the outbreak of war he had only one thought in mind, to become a fighter pilot. Rejected by the R.C.A.F. due to insufficient schooling, he worked his way to England in a cargo ship, only to discover he had left his precious "logbook" behind in Canada. Back on the same ship to Canada he secured his logbook and upon arrival again in England was accepted for the R.A.F.

Flying Officer Beurling credits his success to three things. Good eyesight, improved by practicing observation at great distances; the study of "deflection" shooting and the care of his plane by his ground crew.

Deflection shooting is the art of judging the angle, distance and speed of your own and the enemy's plane so as to allow the proper lead when firing. George Beurling has studied deflection shooting and become so proficient at it that he has just completed a book on the subject for the R.A.F. to be used in training.

Condition of a plane is as important as the pilot's ability, according to him, and proudly boasts that he had the best ground crew and consequently the best plane operating from Malta. He chattered around with his ground crew, each man being a person of his own kind, and a team so to speak, and it is this "team work" which was one of the primary essentials of his success.

In the opinion of George Beurling we are on the way to defeating the Axis, and the air war as and will be one of the most important factors in attaining this end. While paying respect to the skill and courage of Bomber Crews, yet he himself has no desire to pilot a Bomber. Being somewhat of a "lone wolf" he wishes to remain a fighter pilot and continue operating from Malta.

George Beurling has some interesting opinions on the subject of comparative abilities of Italian and German pilots and their aircraft. As pilots, the Italians are better flyers and possess greater personal courage than the Germans, but their training in tactics is not as good as the Germans, resulting in less effectiveness in air combat. Their aircraft are more manoeuvrable but not as fast as the Germans. British pilots and British Spitfires are superior to both.

War, even air war, has its lighter moments as "Ace" Beurling related. On one occasion a JU88 appeared over Malta when one of the crew bailed out. Upon landing it was found he had a suitcase with him containing clothes, shaving kit and a letter addressed to his family back in Germany. When he requested to be mailed them to advise of his safety. He was tired of the war and this was the simplest way out.

Of Air Vice-Marshal Park, a New Zealander, who is the A.O.C. at

Malta, he said he was a good mixer and a swell officer. Air Vice-Marshal Park on more than one occasion was one of the first out with a shovel to help fill in bomb craters on the airfield runways. During one of the many raids, Air Vice-Marshal Park was bombed out of his house, unharmed but losing all his clothes. The only uniform he could obtain for some time was B-10 of an AC2, which he wore and thoroughly enjoyed being unrecognized at times to the extent of other Air Force personnel handing cigarettes and lights from him. George Beurling's bag of 29 enemy planes consist of four bombers and 25 fighters. His best day was one in last July when he brought down four fighters during two flights. The bombers were all JU88's. This remarkable record was not made without injury to himself. On five occasions his plane was disabled, three of them causing crash landings, and one, the last causing him to bail out after destroying three enemy aircraft and being wounded twice. Fortunately, he descended into the sea about five miles from Malta and was picked up by a rescue launch. During his sojourn in the hospital, George Beurling received his well-earned award of the D.S.O. Upon leaving the hospital the R.C.A.F. requested leave for him to visit his family in Canada and make a tour of the country. When flying from Malta to Gibraltar, his transport plane crashed on landing at Gibraltar, killing 15 persons but miraculously sparing George Beurling.

The British Commonwealth of Nations is proud of the way Malta has withstood all the enemy could bring to bear against it, and Canada is especially proud of the exploits of George Beurling and the fact that nearly all of the Air Force Personnel stationed at Malta are Canadians. Flying Officer George Beurling has set an unparalleled example for all Canadians and it is fitting that we quote the official citations of awards made to this daring and skilful flyer.

**FLYING OFFICER GEORGE FREDERICK BEURLING**  
Citation for Distinguished Flying Medal. Award effective July 7, 1942. Sgt. Beurling has displayed great skill and courage in the face of the enemy. One day in June, 1942, he engaged a number of enemy fighters, was escorting a formation of JU88 and destroyed one fighter. Later during the same day he engaged ten enemy fighters and shot two of them down into the sea, bringing his total victories to eight.

Citation for Bar to the Distinguished Flying Medal. Award effective August 2, 1942. Since being awarded the Distinguished Flying Medal in July, 1942, Sgt. Beurling has destroyed a further nine enemy aircraft, bringing his victories to 17. One of his exploits was the destruction of four enemy fighters in one day. During his latest combats he also damaged a further two hostile aircraft. His courage and determination are a source of inspiration to all.

Citation for Distinguished Flying Cross. Award effective October 4, 1942. Since being awarded a Bar to D.F.M., this officer has shot down a further three hostile aircraft bringing his total victories to 20. One day in September, 1942, he and another pilot engaged four enemy fighters. In ensuing combat Pilot Officer Beurling destroyed two of them. A relentless fighter whose determination and will has won admiration of his colleagues, this officer has set an example in keeping with the highest traditions of the R.A.F.

Citation for Distinguished Service Order. Pilot Officer Beurling has destroyed a further six enemy aircraft bringing his total victories to 26. During one sortie on October 13, 1942, he shot down a JU88 and two ME109's. The following day in a head-on attack on enemy bombers he destroyed one of them before he observed his leader being attacked by an enemy fighter. Although wounded, Pilot Officer Beurling destroyed the fighter; then, climbing again, although his aircraft was hit by enemy fire, he shot down another fighter before it was own aircraft was so damaged that he was forced to abandon it. He descended safely into the sea and was rescued. This officer's skill and daring are unequalled.

## My Humble Overall

As Handy In The Army As At The Garage Or Farm

Winnipeg. To conserve more costly clothing, the Canadian Army is encouraging all officers commanding units to make use of overalls whenever possible for training purposes.

A recent army order said that in mild weather "the overalls may be worn directly over the underwear." In anything but severe weather, the greatest may often be dispensed with for training purposes by using the overalls over bathdresses.

Troops enjoy working in overalls, for the added comfort and freedom it gives to their movements and because they know overalls play an important part in clothing conservation.

## Supplies The Power

German People Need Speech By Hitler To Boost Morale

An good a guest as any on the question of Hitler's whereabouts is that he might be found at Berchtesgaden revising, revising, revising a speech in an effort to keep up with developments on the Russian front.

If ever the German people needed a speech by the Fuehrer, they need it now. If ever they needed the assurance that an illusion of omnipotent personal leadership seems to provide for them, this is the hour. The absence of Hitler from the public view, his silence, the uncertainty as to where he is, and even as to whether he is—this may well be as disquieting as the news from Russia.

Who is to tell the Germans they are an invincible people, if Hitler is not sure of it? Who else's intutions can explain the debate on the eastern front? Here is Hitler's opportunity to match the power of his words against those of the personal rival he so detests. Germany today is no nearer to defeat than was Britain after Dunkirk. But can Germans reach "their finest hour" in crisis? Germany is obviously suffering not so much a crisis in public morale as in leadership—a much more serious crisis for Germans than it could possibly be for men and women who led in freedom.

The machine might roll on for months, of course, without Hitler at the controls. But what will infuse it with the power to be more than a machine, to surmount obstacles by a more-than-mechanical ability? If the Frankenstein can hear, it is time for another speech by Hitler—Christian Science Monitor.

## Useful Two-Piecer

4325

By ANNE ADAMS

An Anne Adams two-piece with a bright fashion future is Pattern 4325. It makes a perfect under-your coat outfit right now. Later, it becomes a smart street ensemble. Isn't the fitted top yoke with its round yoked neckline? The skirt panel may be on the bias. Use plain fabric or let the top contrast.

Pattern 4325 is available in misses' sizes 12, 14, 16, 18, 20. Size 16 takes 2 1/2 yards.

Send twenty cents (20c) in coin stamps cannot be accepted) for this Anne Adams pattern. Write plainly: Size, Name, Address and Style Number and send orders to the Anne Adams Fashion Dept., Winnipeg Newspaper Union, 175 McDermott Ave. E., Winnipeg, Man. "Because of the slowness of the mail delivery, our patterns may take a few days longer than usual."

## BETTER FURNITURE

A month of the Board of trade advisory committee told a meeting at Manchester that Britain's utility furniture is higher in standard and gives longer service than pre-war furniture.

War Savings stamps can quickly grow into War Savings certificates. Buy them regularly!

## THIS CURIOUS WORLD

By William Ferguson

THIS IS THE WORLD WE LIVE IN. IT IS FULL OF CURIOUS THINGS. IT IS FULL OF MYSTERY. IT IS FULL OF WONDER. IT IS FULL OF ADVENTURE. IT IS FULL OF CHALLENGE. IT IS FULL OF OPPORTUNITY. ## SANDS OF HAZARD

By J. B. RYAN

### CHAPTER X

ANDRE RIBBET, whatever the cause for his discomfiture, recovered quickly. He returned Ismeddin's cold glance with a calm smile. "I thought you would be detained in argument with the Spahis for the right to punish Storey," he said easily. "I hardly expected Lebanon to surrender him so quickly."

"The foreigners broke jail," exclaimed Ismeddin. "We overtook them trying to overtake you. The Spahis, too, are out, securing the desert for him and the girl."

"Because of the menace of Lebanon, a great threat to Ribbette and the Kahiri as to Storey and Annette, camp was broken in the cold and dark before sunrise and the sheep started on their slow march over the wastes."

It took another day to reach Bir Mazoul, the forgotten oasis landmark for that dreary spot on the sands. Bir Mazoul, like Ain Safa, was closed as a place of water, but they saw its similarity easily. Ain Safa was a spring, with enough water to sustain a town; Bir Mazoul was even a waterhole; the traveler had to dig in the earth to find water; the flowing sand filled in the cup, and the next camper had to scoop out the dirt in turn.

No one lived at the Lonely Well, yet there were people under the drooping palms toward which the Kahiri and the sheep were moving. A mile away, Storey saw three tall shapes that took on the outlines of motor trucks and a smaller car.

"That will be the Germans," Annette said to Storey, "sent to meet Ribbette at Bir Mazoul."

The prisoners were unbound. In the four nights and three days since their capture, Storey had kept his eyes peeled for a chance to escape, he knew, had the girl and Mohammed bin Mulai, but they were not the prisoners of Ribbette, they were in the power of Ismeddin, and there had not been a moment, sleeping or waking, when the three had not been under the watchful guns of the Kahiri.

The small car moved out from the palms, coming to a halt before the

camels of Andre Ribbette and Ismeddin, and out stepped a uniformed figure with red face and blond hair. "Well, mein friend," said the soldier, "you have arrived at last."

"So, Lieutenant Kohli," Andre Ribbette's German was as fluent as his French. "And if I am a bit behind schedule, the number of sheep I bring should compensate for the delay."

THE vanguard of the sheep, reaching the camels, parted like water at a rock and was flowing past toward the oasis. The gate of the lieutenant ran over the gray tide emerging from the cloud of the ever-lunging haze. "Kut," he grunted gutturally. "You have done well, mein Herr."

And then the eyes in the sun blazed face discovered the girl and the man on the dromedary beside Ribbette. "Who are these people?" Kohli demanded sharply. "According to my information you were to use only native help."

"They are prisoners, Herr Lieutenant. This man is an American who killed one of the Berbers. The girl is a smile appearing on Ribbette's round, dust-stained face. "I believe you have heard of her, Lieutenant Kohli. She is Annette Fourner."

The German's head jerked in surprise. "Annette Fourner?" he echoed. The agent of De Gaulle, Herr Gohli, if that is true, you shall give me the Iron Cross for this piece of work. "It is true," smiled Andre Ribbette.

"It is true," the girl agreed solemnly. "I am Annette Fourner."

Ismeddin, who had been waiting, refusing to be nettled by the epithet, "The High Command will be pleased to see you, Franklin Fourner, so famous an agent must know many secrets of those verminous Free French."

The German officer's interest in the car. The milling, hesitating sheep impeded his progress, yet he managed to reach the oasis in advance of the camels. When Ribbette, Ismeddin and the prisoners arrived at the palms about the waterhole, Kohli was at the wheel of his car, striding briskly among the soldiers grouped beside the huge trucks.

The camels knelt, Storey dismounted, glad of a chance to stretch his legs, and assisted Annette from the saddle. Mohammed bin Mulai joined the couple. "Is there nothing we can do, said," he muttered. "In the Name of the Prophet, are we to wait until they have knife or pistol at our throats before we show fight?" Ismeddin the Lawless touched his long rifle to the elbows of Storey and Mohammed. "You cannot stay here," he said briefly. "Come where my men can watch you."

The Kahiri, as Bedouins do at every halt, were grouped about the shallow well making a pile of camels' heads preparatory to boiling water for tea. Under the ungainly of the sheik's wife, Annette and Mohammed advanced dutifully toward the gathered Berbers.

Storey followed more slowly, trying to decide whether the quivering of the automobile of Lieutenant Kohli was due to changing heat waves or was the vibration of a running motor. The thought stopped him in his tracks. If he and his companions could get to that car—

"GOTT in Himmel!" The snarling of Kohli cut into the speculation of Storey. The German, his face redder with anger than from sun, was striding from the trucks toward the Bedouins at the waterhole. He shouldered one of the surprised Berbers aside and, with a kick of his boot, sent scottered the little heap of burning brush.

"Get back on your camels, you lawless swine!" roared Kohli. "We do not stop here! Round up those sheep! We are leaving this place at once!"

The Kahiri fell back before the angry officer, broken blades steeling toward knives and guns. "Achtung!" snapped the lieutenant without turning his head, and he eluded in the rifles of the Nazi soldiers behind him. "Peace, O Roumi!" called Ismeddin, moving forward. "There is some mistake here. The Kahiri bargained only to bring the sheep from Ain Safa to Bir Mazoul."

"Those sheep must be moved with out delay," Kohli and Ismeddin stood face to face. "Tell your men, O sheik, to mount their camels and return to duty."

"The Kahiri do not leave the lands they know," Ismeddin retorted stoutly, and turned to the head of pale eyes on Andre Ribbette who had appeared beside the lieutenant. "The Kahiri return to their village, said Ribbette. You will pay me the money on which we agreed."

"Money?" The renegade sneered into the Berber's face. "There is no money. Ismeddin. That is why I did not wait you here when your men were to be told their work was only partly done. You said, did you think I would pay all that silver you demanded?"

The hand of Kohli slid closer to the holster gun at his waist. Ismeddin said, with cold hauteur: "I ask you once more, said Ribbette, for the silver you promised me."

"You get no money, Ismeddin," Ribbette said flatly. "And whether you like it or not, you are going to move those sheep for us."

"Then, by Allah!" snarled the Berber, swinging his coiled rifle toward Ribbette. The oath and the rifle were checked in breath and motion by the crack of a pistol. Ismeddin staggered and dropped at the feet of Kohli, the man who had shot him.

WITH the discharge of the automatic, Jack Storey whirled. "Annette, Mohammed!" he shouted, racing toward the nearby car. His voice was drowned in the bark of guns as the waiting Germans advanced.

## Helping to House Canada's War Workers

WITH the huge shell-filling plant came to his town, Charles Hunter got to thinking about the critical shortage of housing; . . . and about the two large cottages he owned. It wouldn't cost much to modernize and sub-divide them to make comfortable homes for four families.

He talked it over with his bank manager, who extended him a \$600 loan. With the money, Hunter not only converted his cottages but took part of the loan, along with some of his rental income, to remodel another house to accommodate eight single individuals.

With the aid of the bank Hunter helped to provide urgently needed homes for war workers. He has now paid off all but \$100 of the loan. A very small amount paid out for interest has thus enabled him to more than double his former revenues.

Such modest, highly useful loans typify the contributions that the banks make to Canadian enterprise. The above story is an actual case—only the name has been changed.

More than 5,000 experienced bank men out of 14,433 have gone into the armed forces since war began. This throws a greater burden on remaining staffs and new employees. Do your banking early in the day. Pay small bills by cash instead of cheque wherever possible. It all helps.

**The CHARTERED BANKS of CANADA**

### LOCAL & GENERAL

Miss Betty Barrett, of Calgary, visited her home here last weekend.

Pie, Don Lamont, who is training at Camrose, was home on leave last weekend.

Take a tip from the Builder's and get your Satin-Glo now.

AC1 Earl Cummins, who is with the R.C.A.F., at Brandon, is spending his leave at his home here.

Sgt. Jack Garner, of Calgary, spent his weekend leave at his home here.

Mr. and Mrs. Harry Pearson are visiting with their daughter, Mrs. Max Hearst, at Calgary, this week.

Mr. and Mrs. Neil Erickson and son Denny, left on Sunday for their new home in Camrose.

Mrs. Mack left for Calgary last Friday where she will spend a few days.

Pie, Richard Light R.C.A.S.C., of Mewat Barracks, Calgary, spent the weekend with his cousin, Miss Zillah Cressman.

Miss Ruth Ardy, of the Royal Bank Staff, who spent her holidays at her home at Tees, Alberta, returned to her duties on Monday.

The Misses Esther Teynor and Elsie Luft, who have spent the past five months at Welland, Ontario, returned home last week.

It is reported that Harry Montgomery had the misfortune of accidentally losing a finger, a couple of weeks ago.

Elmer Wall, who is on the staff of "The Mountaineer" at Rocky Mountain House, was visiting his home here last weekend.

David Allan Wright, formerly a resident of Didsbury, enlisted in the Canadian (Active) Army recently, at Calgary. Previous to his enlistment he was employed as a farmer.

Mr. and Mrs. Allan McRae and family, of Rocky Mountain House, and Mr. Jim Wright, of Innisfail, spent Sunday with relatives at Didsbury and Elkton.

Ed Buhr, who has been honorably discharged from the Airforce on account of physical disability, is visiting his home here. He expects to take a position in the south country shortly.

Baillie David Carleton, formerly a resident of Didsbury, enlisted in the Canadian (Active) Army on March 18, at Calgary. Previous to his enlistment, he was employed as a store clerk.

Glen Levagood, a former clerk of the Builder's Hardware, Didsbury, and later at Carbon, for eighteen months, has enlisted in the R.C.N.-V.R. and went into active service at Calgary on Monday.

Kenneth Alexander Cameron "Scotty" McNair, enlisted in the Royal Canadian Air Force "Air Crew" as Potential Pilot or Observer. AC2 McNair starts his training on Wednesday, at the Edmonton Manning Depot.

A shower was recently held at the home of the newlyweds, Mr. and Mrs. Delbert Levagood, with sixty two friends and neighbors present. The happy couple received many useful and beautiful gifts from their friends, who wished them well in their new home.

The local detachment of the Alberta Women's Auxiliary Corps, will give a chance at the Didsbury Theatre on Monday, March 29th, in aid of the Red Cross. The "Red Aces" of Innisfail will supply the music, and dancing will be from 9 p.m. to 2 a.m. Admission 50c each.

"King's Row", starring Anne Sheridan and Robert Cummings, is the feature at the Didsbury Theatre this week. The famous book now becomes a screen sensation in a story of the "town they talk of in a whisper." A most unusual picture.

Mr. Alton Mack, who is employed as timekeeper for Bennett & White Construction Company at Whitehorse, Yukon Territory, for the past five months, flew as far as Edmonton with the C.P. Airlines last week. He is spending a couple of weeks holidaying with friends and relatives at Didsbury and Calgary.

### LOCAL & GENERAL

The regular meeting of the Canadian Legion will be held this Saturday evening—on the West.

Flying Officer David Iverach, who has been visiting at the Rantons last weekend, returned to his duties at Prince Rupert, B.C.

Mr. and Mrs. Hugh McGivern, of Calgary, spent the weekend at the home of the latter's parents, Mr. and Mrs. S. Klecko and family.

Starting next Monday, the Drug store will close at 6.30 each evening except Saturday. In case of emergency, phone 139.

Little Irvin Schmidt's general condition is improving after a third operation on his head, on March 19. He can see a little, but his right arm and leg are still helpless.

Mr. Jim Shells, who together with Mrs. Shells had been visiting his sister, Mrs. Kate Hutchinson, at Dryden, Ont., returned on Monday. It is over 60 years since brother and sister last met. Enroute home Mrs. Shells stopped off at Virdon, Man., for a short visit.

Mr. Jack Law, who has been with the Law Drug Store for the past two years, has taken the position as assistant manager at Liggitt's Drug Store, Edmonton, and will leave to take his new position at the end of the month. Mrs. Mabel Reiber has taken the position as assistant at the local drug store.

### Didsbury Jottings

By A.C.H.

Didsbury Cubs are doing exceedingly well on their enthusiastic Culumaster, Mr. Chas. Geiger. The youngsters are keen and enjoy their Tuesday evening meets, as only small boys can. Scouts are being re-organized under the supervision of Mr. Elford Sheldon. Both the boys and Mr. Sheldon are very interested in getting a new troop formed. It looks as if the venture should be very successful.

Mrs. H. Hawkes entertained at tea last Thursday. Mrs. Hawkes' newly decorated home is very charming, and we are sure that our otherwise perfect complexion was tinged with green as we admired it.

Gnr E. I. DeMann is home on leave. We don't have to read it in the newspapers to know that. Any one who has a dear wife can feel the love-light glowing from her eyes a mile off. Mrs. DeMann entertained her husband's relatives on Sunday.

Mrs. Bowman celebrated her birthday Tuesday at the town's most popular rendezvous.

### E.L.C.E. Entertains

#### Ev. Congregation

The E.L.C.E. entertained the congregation of the Evangelical church in the church parlors on Friday evening March 19. Mr. Lorne Leisner was chairman for the programme which was given.

It was in the nature of a Talent Hour. The choir sang "Listening." Piano solos were rendered by Grace Gode, Verna Feg and Joan Berscht, Jean Rennie, Mary Ringheim, Mrs. W. D. Klein and Verne Wrigglesworth gave readings. A trio was sung by E. Dippel and Rev. and Mrs. A. M. Amacher. Jean Launon and Wava Deadrick sang a duet entitled, "Come, Holy Spirit." Dorothy Buhr and Mrs. Amacher sang solos. Mr. H. W. Gabel played a guitar solo.

A picnic social was held after the programme and a free-will offering was received for the E.L.C.E. treasury, amounting to \$80.

The young people wish to thank the congregation for their splendid support.

### Cards of Thanks

We wish to express our deep appreciation for the kindness shown us and the expressions of sympathy during our bereavement.

J. Whitehead and family

### United Church Notes.

The Didsbury curling club and the Didsbury ladies' curling club will attend the service at Knox Church next Sunday evening when the minister will preach a suitable sermon.

Everyone concerned is reminded of the communicant class in the church at 11 o'clock on Saturday morning.

The minister will also be pleased to meet anyone desirous of joining the church, at the close of the evening service.

These are days which try the faith of men. Why not strengthen your faith by standing with those who have found help in depending upon the Eternal God and His Gospel.
